

FOR SALE

2018/2019 African Endurance Champion Winner

Aidcall247 / AutoLIFT Production - Ligier JS53 EVO

2015 Chassis number 18

The JS53 is the final evolution of the CN specification from the French manufacturer Ligier. This car features a full carbon fibre monocoque (older versions are aluminium) and crash box. Powered by the Honda K20 2.0 litre type R engine the car weighs 565kg and the engine produces 265bhp. As with all current specification cars the JS53 comes with paddle shift via the Sadev 6 speed gearbox. The introduction of this feature means it is impossible to over rev the engine on down changes and no more missed gears. The engine life is 60 hours between refreshes and the current motor has 13 hours use.

A comprehensive data logger is also fitted onto the car so performance can be analysed from the driver and vehicle. The usual wheel speed, steering input, brake pressure and even the damper trace can be inspected. The dash board on the steering wheel gives all the driver information including lap times, fuel usage temperatures & pressures.

The Ligier can be set up individually for each circuit to maximise its performance and the car comes with instructions for each South African circuit it has raced at.

We have owned the car for two seasons and imported it from the French IDEC Sport team (the current LMP2 European Champions) and its history has been carefully recorded. The car comes with many spare parts and supply of new is easily attained from Ligier themselves in Magny Cours, France (they all speak English and are very supportive of the Ligier's here in South Africa). We have always lifted the major parts and this season have replaced the drive shafts, fuel pumps, two brake callipers, steering rack and refreshed the engine. In short, the car has been meticulously looked after and is prepared to a very high standard by the Team at **RicoBarlowRacing**.

The Ligier JS53 EVO is an easy car to drive and is immensely quick, out pacing most other race cars in the country. As it is light, the power to weight ratio is strong and sophisticated aerodynamics gives the car impressive levels of downforce. This low weight also means tyres and brakes last a lot longer than GT cars. The fuel economy is also excellent as the car can run for two hours on a full tank of fuel, thus making it a very strong package in endurance racing.

The car has won the South African endurance series in 2018 & 2019 entering in 11 races of which it won its class 7 times and won outright 3 times.

Lap times recorded

Phakisa	1 min 35
East London	1 min 20
Zwartkops	1 min 00
Port Elizabeth	57 seconds
Killarney	1 min 10

This car is supplied with a comprehensive spares package listed separately but apart from the usual consumables there is nothing needed to take the car on track. The team at **RicoBarlowRacing** will be happy to offer any assistance to the new owner and further technical support can also be obtained direct from Ligier.

There is also the option of having the team at **RicoBarlowRacing** run the car for the new owner and can style a Race Management and Support Package to suit.

The car was imported into South Africa direct from France in early 2018 with all duties, & taxes paid appropriately.

1	set	Hankook Tyres on rims	Used	As good as new or new
1	set	Michelin Tyres on rims	Used	completed 3 hr race
1	set	Wet tyres only	New	Unused (24 months old)
1	part set	Koni Dampers (3 units)	Used	good
2	set	1000 lbs spring	Used	Very good
2	set	1200 lbs spring	Used	Very good
1	ea	alternator	Used	Very good
2	ea	Brake Calipers	Used	Very good
4	ea	brake discs with bells	Used	good
2	ea	Fuel Pumps	Used	good
2	ea	water pump pulley	used	Very good
2	ea	stub axle	used	good
3	ea	anti roll bar	used	good
1	ea	wheel hub	used	good
1	set	coil pack with fixed wiring set	used	good
1	ea	silencer	used	cracked
1	set	exhaust header with accumulator	used	very good
4	ea	LED headlights	used	good with mount bracket
2	ea	Radiators	New	
1	set	Rear wing support brackets	Used	disassembled
4	set	Brake Pads	Used	
1	ea	Radiator Grid	New	
4	ea	Front Lower Board (Triangle)	used	Very good
2	ea	Front Lower Board (Triangle)	New	
3	ea	Front Perspex Screen	New	
2	set	driveshafts with components	Used	Good
1	ea	Front Top Body Cover - Accident damaged	Used	damaged - reparable
1	ea	Steering Knuckle	Used	Good
1	ea	Steering Rack n Pinion	Used	Good
6	ea	Front undertray rub plates	New	
6	ea	Loose Brake Disc Bells	Used	Good
2	set	Clutch Kit with Pressure Plate	Used	Fair
2	pack	Piston Caliper Rubbers	New	
1	ea	Front Lift Stand	Used	Good
1	ea	Rear Wing Main plane	Used	damaged - reparable
1	ea	Rear Wing secondary plane	Used	damaged - reparable
		Various Gear Ratios		

Asking price for the car including all the spares package is R1.6 million.
